“Arkansas Grown”
FRUIT TREES

**Shade Trees, Shrubs, Roses,
Plants, Vines, Etc.**

PARKER BROS. NURSERY CO.

THE FAYETTEVILLE NURSERIES

FAYETTEVILLE, ARKANSAS

Introductory

To Our Numerous Friends and Customers:—The continued patronage of our friends, as shown by their frequent and increasing orders, assures us that our efforts to please them are appreciated. This will stimulate us to still greater efforts, and will warrant us in making expenditures to secure the best results.

Nothing better illustrates the progress of our country, the advance in civilization its people are making and the fact they are learning to live better, than the greatly increased and continuing demand for nursery stock, both fruit and ornamental.

While this demand is stimulated in part by the knowledge of the great profits which result from the systematic planting and careful cultivation of many kinds of fruit, it is by no means limited to this incentive. In every rank and station of life, including the humblest and most opulent, those residing in town and country, are beginning to see that nothing can add so much to the comforts of living as a constant supply of the best varieties of the different fruits for home use, and nothing will do so much to adorn their homes, gratify a sense of the beautiful, and produce refinement in their families as the planting of such well-selected varieties of ornamental trees, shrubs, roses, vines, etc., as the ground about their houses will permit.

Some persuade themselves that the demand for fruit and fruit trees has already reached its limit, but canning and the improved methods of factory drying have increased the domestic consumption of the different fruits, by rendering them nearly as good as fresh throughout the year, and that by means of these processes and improved facilities for shipping fresh fruits, the fruits of the United States can be exported to the remotest quarters of the globe. Millions upon land and sea are now supplied who have hitherto been deprived of such luxuries and no one can doubt that the setting of trees and plants for the production of large and small fruits at a much better profit than can be derived from ordinary farm crops, is also in its infancy.

Suggestions to Planters

Success depends in a large measure on the treatment given stock after it is received by planters. Avoid all unnecessary exposure to the air. As soon as received it should be heeled in, so that mellow earth will come in contact with the roots. When planting take out but few at a time. One hour of exposure to hot sun or drying wind is sure death to many trees.

When trees arrive the bundle should be opened up and trees trenched out good and deep and well watered. Do not expose them to cold or drying winds at any time. Before planting take off tags and labels. Cut off broken and bruised roots.

Prune one year trees to a single stem. Cut this stem off from 18 to 24 inches of ground, just above two or three buds. Branched trees should have branches cut back to within 4 to 6 inches of main stem of tree. Roses and Grape Vines should be cut back to within 3 or 4 inches of ground. Plant in well pulverized soil from 1 to 2 inches deeper than they grew in nursery, pack the ground firmly, then rake loose soil on top. Cultivate often.

"Heeling in" Stock Received in the Fall—To insure success you have only to get the trees before freezing weather and bury them in the following manner:

Choose a dry spot where no water will stand during the winter, with no grass near it to invite mice. Dig a trench, throwing out enough dirt to admit one layer of roots below the surface, and place the trees in it inclined at an angle of 45 degrees or more. Widen the trench, throwing the soil among the roots in position, place another layer in the trench, reclining the tops on the others and so on until all are in the trench; then water thoroughly. Finish by throwing up more soil until the tips of the trees are fully covered. It is also well to bank up the earth around the sides to insure more thorough protection. Care should be taken to fill solid all the interstices among the roots. Too much care in doing this can not be insisted upon, as every root which is not in close contact with the soil is sure to be killed. In the spring the trees will be on hand for transplanting at the earliest moment possible to do the work.

Business Terms

READ BEFORE ORDERING

Shipping Season—Begins October 15th and lasts until April 15th.

Order Early—as our orders are shipped in the rotation they are received—*First come, first served*. We can not delay orders received first for orders coming later, requiring immediate attention. If for any special reason it is necessary that an order be shipped on specified date make a note on the order and we will comply with the request if possible.

Remittances—Should be made by P. O. or Express Money Order, Registered Letter or Check.

Terms—Orders booked in advance of shipping season, one-fourth of the amount of bill must accompany order, the remainder to be collected C. O. D. when shipment is made. Orders for immediate shipment must be accompanied by cash, or satisfactory references.

Prepaid—We prepay express or freight on orders amounting to \$10.00 or more.

Warranty—While we exercise the greatest care to have all our trees and plants genuine and reliable, and hold ourselves prepared to replace, on proper proof, all that may prove untrue to name, we do not give any warranty, expressed or implied, and in case of error on our part it is mutually agreed between the purchaser and ourselves that we shall not, at any time, be held responsible for a greater amount than the original price of the trees.

Claims—All claims for errors and deficiencies must be made within ten days after the receipt of the stock. We desire to be notified of mistakes as early as possible, so we may rectify the same without delay.

Our Aim—Our aim is to have every deal a satisfactory one.

Our Stock—Our stock is first class and will be packed in the best manner.

Our Prices—Our prices are as low as we can afford for first class stock.

We are now in position to promptly execute orders for goods mentioned in this catalogue, and hope to have the pleasure of supplying your wants.

No Scale or Disease—Our Nurseries are inspected annually by the State Nursery Inspector and a Certificate of Inspection accompanies each shipment.

Special Prices—To buyers of large lots, we will quote special prices—buyer paying freight.

The above is a picture of our Frost-Proof Storage Building. This building will hold twenty-five cars of trees.

As soon as our trees are dug they are taken to this building and carefully graded and prepared for shipment. All inferior and cull trees are thrown out and burned.

Very few Nurserymen in the Southwest have any facilities for handling their stock. The trees are graded and packed out-of-doors, exposed to the sun, drying winds, and freezing weather. Facilities for packing and handling stock properly are just as essential, or more so, than good land, good teams, or other equipments.

Select Apples

"What plant we in this apple tree?
Sweets for a hundred flowers of spring;
To load the May wind's restless wings,
When, from the orchard rows he pours
His fragrance through our open doors.
A world of honey for the bee;
Flowers for the sick girl's room,
For the glad infant, sprays of bloom,
We plant in the Apple tree."

—Bryant.

Summer Varieties

Yellow Transparent—Best early market apple. Trees will bear at two and three years old.

Early Harvest—Yellow with sub-acid flavor, juicy and very desirable.

Red June—Medium size, red, splendid flavor, and good bearer.

Red Astrachan—Large, red, round and good cooker.

Summer Queen—Very large, yellow with stripes.

Liveland Raspberry—The best early red variety. Tree very hardy and a fine market variety.

Summer Pearmain—Large, yellow and good. Early variety.

Horse—Large, yellow, and good for kitchen use.

Maiden Blush—A fine variety for home use and market, yellow with red cheek. Tree hardy and a good grower.

Sweet Bough—Large, pale yellow, popular, and high quality. A good market variety.

Fall Varieties

Grimes Golden—Yellow, highest flavor, and good bearer. One of the best commercial varieties.

Shannon Pippin—Green, extra large, and good.

Duchess—Russian variety. Tree hardy, vigorous, and a good bearer.

Rome Beauty—Large, with red stripes, tender and juicy. A fine variety for either home or market.

Jefferis—Tender and prolific, quality best, hardy tree.

Snow—Red, flesh white and juicy.

Yellow Bellflower—Juicy and fine flavor.

Wealthy—One of the most desirable varieties. It is gaining in popularity. Productive, dark red in color. Fall variety, but keeps well in cold storage.

Fall Pippin—Large, yellow, tender and juicy.

Winter Varieties

Jonathan—One of the best commercial variety, young and productive bearer.

Black Ben Davis—Of the Ben Davis type, a large red apple, hardy, and a fine market apple.

Winesap—Dark red, fine flavor.

Stayman's Winesap—One of the finest apples in cultivation. Superior as a market variety to its parent, the old Winesap.

Mammoth Black Twig—Very large, flat shaped, dark red, good quality, valuable for market.

York Imperial—Red, good bearer, fine for market.

Arkansas Black—Fine color, good keeper, but a shy bearer.

Coffelt—Cross between Ben Davis and Red Limber Twig, a good bearer and a fine keeper.

Collins Red—(Champion), bright red, medium size, good keeper, good bearer, a valuable market variety.

Gano—Of the Ben Davis type, large red apple, hardy, and a fine market apple.

McIntosh Red—Dark red, best quality, juicy and refreshing. A good annual bearer of handsome fruit.

Oliver Red (Senator)—A fine large apple of uniform shape and size.

Ben Davis—Too well known to need description.

Wolf River—Very large, tree very strong grower and a fine bearer.

Winter Banana—Fancy market, fruit is pale yellow.

Special Varieties Apples

Ar-Jo-Ma—A seedling of our own introduction. Has borne eleven crops in succession. A better keeper than the Arkansas Black, equal in color and bearing to the Jonathan, and far superior to the Mammoth Black Twig in hardiness and flavor.

Anderson's Southland—The best sweet apple grown. Fine delicious flavor. The original tree from which our cions are cut, is the oldest apple tree in Northwest Arkansas, and has borne annual crops since it was planted before the war.

We are testing many new varieties of apples. In future issues of our catalogues, we will describe those of especial value.

If there are any varieties of apples you want, not given in our list, we may have them in stock, as we are growing many varieties not given in the above descriptions, having only space to mention the leading varieties.

Select Crab Apples

As ornamental, or for jellies, preserving, etc., the Crab Apple is unequalled. They are very hardy and prolific, coming into bearing when very young and commanding a ready and profitable market. We mention the best kinds.

Hyslop—Very large, deep crimson, popular.

Red Siberian—Fruit small, beautiful, free grower.

Transcendent—Skin yellow, early and heavy bearer.

Whitney—Large, flesh firm and juicy, pleasant flavor.

Yellow Siberian—Large, tree vigorous, beautiful color.

Select Peaches

Mayflower—The best early peach. Brings fancy price in market. Color "red all over."

Sneed—Fruit medium to large, greenish white, blush on sunny side. Juicy. Semi-cling.

Alexander—Medium to large, is very juicy, of good quality.

Triumph—Early, yellow, abundant bearer, vigorous grower.

Early Rivers—Large, creamy white with pink cheek, juicy and melting.

Carman—Large, creamy white with deep blush.

Slappy—Thrifty grower, very hard and prolific. Excellent flavor, good keeper. Freestone.

Crawford's Early—One of the best yellow peaches, vigorous and productive. Large size.

Arp Beauty—Yellow skin and flesh, red cheek, semi-cling.

Elberta—Good bearer, hardy. A good commercial, yellow peach.

Chinese Cling—Very large, juicy and sweet.

Crawford's Late—Yellow, very hardy, good bearer.

Salway—Strong grower, productive, yellow, well known and very popular.

Belle of Georgia—Large, white with red cheek, flesh white. Freestone. Ripens with the Crawford Early.

Crosby—Fine, bright yellow peach, streaked with carmine. Freestone.

Emma—Large, yellow peach, resembles the Elberta. Freestone.

Foster—Large, flesh yellow, rich and juicy. Early.

Fitzgerald—Flesh rich, deep golden yellow, very firm. Ripens between Early and Late Crawfords.

Greensboro—Large, oblong, rich, juicy, sub-acid. Early.

Heath Cling—Very large, creamy white with faint blush. Flesh white.

Mamie Ross—White, splashed with red. Semi-cling to free when fully ripe.

Old Mixon Free—Large, yellowish white with deep red cheek. Tender and juicy, very hardy and productive.

Stump The World—Large, roundish, skin white with bright red cheek. Flesh white, juicy and good. Freestone.

Special Varieties Peaches

Madison County Mammoth—Has grown here for 20 years and is very hardy. Will bear crops when other varieties fail. It is a large cling peach, ripening in August. Has been known to weigh 20 to 24 oz.

Arkansas Indian Cling—The Old Time Indian Peach, red, fine flavor. Hardy and productive.

Arkansas Indian Free—A large freestone, red, good flavor. Hardy and productive.

We are raising other promising varieties of seedling peaches that have originated in this section. The varieties of exceptional merit will be described in further issues of our catalogue.

Select Cherries

Dyehouse—Ripens a week before the Early Richmond, fine quality and very productive.

Early Richmond—Light red, very valuable for cooking, early in the season. Tree a good grower, hardy, healthy, and very productive.

Montmorency—Tree very hardy and an immense bearer. Commences to bear while young and is loaded annually thereafter with fine crops. Fruit very large, fine flavor, bright clear red. Valuable everywhere. A week later than the Early Richmond.

English Morello—Very dark red, nearly black. Large. Tree dwarf grower and early bearer. Ripens after the Montmorency.

Napoleon (Royal Ann)—Sweet and yellow. Tree vigorous, strong growing, and abundant bearer. One of the best yellow varieties.

Black Tartarian—Very large, flavor mild and pleasant. Tree a remarkably vigorous, erect and beautiful grower, immense bearer.

In addition to the above we recommend the following varieties: Royal Duke, Governor Wood, Baldwin, Bing, Wragg.

Select Pears

Early Harvest—Fruit medium to large. Rich golden yellow with red cheek, thickly covered with gray dots. Valuable for early market.

Bartlett—Large size, buttery, very juicy and highly favored. Bears early and abundantly.

Dwarf Duchess—Very large, with rough and uneven surface of a greenish yellow with patches of yellow and a dull red cheek. Vigorous, strong grower and a good bearer.

Garber—Fruit nearly round, large and yellow. Noted for vigor, freedom from blight, and heavy bearing.

Kieffer—Fruit large, rich yellow, tinged with red, somewhat rusty, and very handsome. Flesh very white, buttery and juicy. Tree a vigorous grower, early and regular bearer. Very productive, and commands the highest market price.

Seckle—Small size, yellowish with a red cheek. Flesh whiteish, buttery, very tender, juicy and melting. The common Sugar pear, and a very prolific bearer.

In addition to the above we recommend: Koonce, Vermont Beauty, Anjou, Wilder, Clapp's Favorite, Winter Nellis, Flemish Beauty.

Select Plums

Early Gold (Shiro)—Tree a strong grower. Fruit produced in great profusion is large, uniform size; clear, light yellow, and so transparent that the pit can be seen through the flesh, which is firm and juicy. Will keep in good condition for a month.

Red June—Unequalled for market value. Of large size, deep red color, ripens earlier than the Abundance.

Abundance—A popular new Japanese Plum. A favorite everywhere. Tree thrifty, hardy and beautiful. Fruit large, showy, good and richly perfumed. A profitable kind and one that should be in all Plum orchards.

Burbank—Japan, yellow covered with purplish red. Abundant bearer.

Wickson—Originated by Mr. Burbank, who says, "Among the many thousand Japanese Plums I have fruited so far, this one stands pre-eminent. A strong upright grower, productive, almost to a fault. Excellent keeper and shipper.

Wild Goose—Deep red, very sweet and juicy. Tree a hardy and vigorous grower and an abundant bearer.

In addition to the above, we recommend the following varieties: Mariana, Gold Beauty, Moore's Arctic, Blue Damson.

Select Prunes

The opinion has prevailed that Prunes could not be grown in this section of the country. Investigations, which we have made, show that the following varieties can be grown successfully which has been demonstrated by several heavy crops.

Italian Prune (Fellenberg)—Large, dark purple, flesh greenish yellow. Freestone.

French Prune (Petite)—Medium size, purple, sweet and rich. Standard for drying.

Select Apricots

Early Golden—Large, bright yellow, delicious flavor.

Moorpark—Large, orange yellow with red cheeks. Very productive.

Russian—Tree hardy, immense bearer.

Select Quince

Orange—Fruit large, bright yellow, good bearer.

Champion—Fruit large, long keeper and good bearer.

Select Blackberries

Early Harvest—Very prolific, ripens early. This is unequalled for a market variety.

Snyder—Ripens after Early Harvest. Very large, sweet and luscious. Hardy and productive.

In addition to the above, we recommend the following varieties: Rathbun, Lawton, Taylor's Prolific, Wilson's Early.

Select Raspberries

Kansas—Black, very productive, good market variety.

St. Regis Everbearing, *New*—Bears the first season after planting. A large, red berry.

In addition to the above varieties we recommend the following: Black Caps—Gregg, Cumberland, Black Diamond. Red Caps—Miller, Cardinal, Brandywine, Turner.

Select Grapes

The Grape is the most healthy of all fruits and the most highly esteemed for its many qualities and uses.

It can be grown by anyone who has a garden, a yard or wall. It can be bound to a stake, trained over a trellis, or a wall, until it covers a large tree or building, and still it yields its grateful bunches of large luscious fruit.

Grapes contain Potash Salts in large quantities, and are remedial agents of great value. They are taken into the blood almost at once and through that purifies the blood and strengthens the nerves. The large quantity of sugar they furnish renders them important from the standpoint of nutrition. Aside from their value as a home fruit, no fruit will bring greater prices when grown for market. One grape grower in this section made \$1100 net profit from one acre.

Moore's Early—Bunch large, berry round, color black. Vine hardy, free from mildew and disease. Matures early, twenty days before the Concord.

Concord—Large, handsome grape. Vine hardy and productive; one of the most popular market grapes, matures early. Large black.

Delaware—Bunches small and compact, berry rather small, round; skin thin, light red, flesh juicy, exceedingly sweet and a delicious flavor.

Niagara—Bunches very large, uniform and compact; skin thin but tough, quality good, a very sweet and white grape.

Ives Seedling—Dark purple color, hardy and productive, compact.

Worden—Bunch and berry large, black, compact, handsome; a fine table grape.

We recommend the following additional excellent varieties: Cynthiana, Moore's Diamond, and Brighton.

Gooseberries

This fruit is useful for cooking, when green or ripe, and it may be canned with such facility that it is beginning to be cultivated very extensively for both home use and market.

Houghton—The finest grower, very productive and free from mildew.

Downing—Fruit large, vigorous and productive.

Pearl—Heavy bearer, strong grower.

Select Dewberries

Lucretia—Large, very prolific, sweet flavor.

Austin—Very large, acid, vigorous, productive.

Currants

Ripe just before Raspberries are gone, continuing in prime order for several weeks, there is no more useful fruit than the currant, and is among the easiest to cultivate.

Red Dutch—An early, well known, standard variety.

Fay's Prolific—Abundant bearer, fine flavor.

Pomona—A new red currant, one of the best.

Juneberry and Huckleberry

Nothing is so sure to bear, or yields more abundantly than the Juneberry. Very valuable for home use or for market and will grow most anywhere. They also make a beautiful hedge or a nice ornamental bush.

Japanese Persimmons, Figs, Etc.

All the leading varieties.

Strawberries

Leading Varieties—Mitchel's Early, Klondyke, Lady Thompson, Aroma, Gandy.

Garden Roots

Horse Radish

The increasing demand for Horse Radish in restaurants, hotels and private houses, chiefly during the oyster season, has naturally led to improved culture and species. Very profitable returns have been secured by grating the Horse Radish and packing it in vinegar, and selling to hotels and retail stores. There is also a considerable demand in jobbing houses.

Any farmer looking for a lucrative specialty should give Horse Radish careful consideration. The roots sell at from 4 to 7 cts. per pound, ungrated. The usual retail price is 10 cts. a pint, (without vinegar) which is the equivalent of a half a pound.

Asparagus

No vegetable is so generally in demand in the spring as the

the tender, succulent sprouts of asparagus. Wherever gardeners taking up this culture carefully and give the time and attention to it, which it requires, it has proven a very profitable crop. When thoroughly cultivated and fertilized the net profits run from \$200 to \$300 per acre.

If you are fond of good eating, be sure and have one asparagus bed in your garden, and give it careful attention.

Mammoth Rhubarb

Rhubarb, familiarly known as "Pie Plant" or Wine Plant, is cultivated in gardens for its leafy stalks, which are used for sauce, pies, tarts, canning, etc. The plant is so well known that it is needless to further urge its value. The large size and fine quality of the new variety over the old varieties of "Pie Plant" cannot be conceived by those who have never grown it. It is very profitable to grow for market purposes, as it is always in demand and commands good prices. It grows very rapidly and requires so little cultivation that it is without doubt one of the most remunerative and profitable garden plants. One grower of Rhubarb near Fayetteville has cleared on an average \$300 per acre from his rhubarb crop. Be sure to plant some for home use if you do not care to go into it on a large scale. We have the best variety of Mammoth Rhubarb, and never ship little seedling roots. Our carefully selected roots are strong and vigorous, and produce the first year.

Select Mulberries

Downing's Everbearing—Large, valuable, abundant bearing.

Hicks' Everbearing—Large, black and sweet. In fruit several months.

Russian—Very hardy, rapid growing, and of great value as a timber tree.

Nuts

The demand for nuts is rapidly increasing each year. The growing of Pecans, English Walnuts and other nuts is proving to be a profitable industry. Groves of Black Walnuts are being planted which are proving very profitable. We recommend, and can furnish the following varieties of nuts: Grafted and budded Pecans, Seedling Pecans, American Sweet Chestnut, Spanish Chestnut, Black Walnuts and English Walnuts.

Herbert W. Collingwood, editor Rural New Yorker, in the issue of December 25, 1909, says: "Nut growing is a business which I am sure is to be a great feature of future farming. We are to get a good share of muscle-making food from trees. Prices of meat are soaring, and thousands of people find each year that they can keep up their strength and do more and better work when they substitute nuts for meat in part or entirely. I am not trying to argue for

vegetarianism, but merely stating facts. The demand for nuts is sure to increase. If you plant a nut grove today, before it comes in bearing you will find demand ahead of supply. A few men realize what is coming and are interesting themselves in improved varieties of nuts, as hickories, chestnut or pecans."

Ornamental Department

While most people appreciate well arranged and well kept grounds, large or small, many fail to realize that they too can have equally fine grounds. We frequently observe a few roses growing in thick turf, with no attention given to pruning or cultivating. Under such circumstances good results can not be expected.

Aside from the pleasure of having fine trees, shrubs, vines and flowers in the grounds surrounding a home, a few realize how much these add to the commercial value of the place. A purchaser having to decide between a house with bare and unkept grounds and one surrounded by fine ornamentals, invariably chooses the latter at a marked advance in price, because he sees that he will at once enjoy what it would otherwise take some years to secure. Sagacious men are led by a knowledge of these facts to plant fine trees and shrubs about vacant lots they are intending to put upon the market. Lots thus planted readily secure purchasers at good prices when bare grounds go begging for buyers.

Shade Trees

"There is fine patience and broad charity in the man who plants a tree;

No single action better typifies the purpose of our living.

He who plants a tree plants shade, rest, hope, love, peace for troubled ones who will come his way when he is gone,

There is nothing in which God asks so little of us and gives so much, as in the planting of a tree."

Sugar or Rock Maple

One of the best street and shade trees, having dense foliage, turning light yellow and scarlet in autumn. Seldom fails in transplanting, and is hardy and vigorous in this climate.

Silver Leaf Maple

A very quick grower, but owing to the low, slender branches, is better adapted to lawns and gardens than for street use.

American White Elm

A native tree of large size, with open, spreading head and graceful drooping branches. Very popular in nearly all sections, and valuable for street planting. Succeeds admirably even where the soil is somewhat heavy and damp.

Norway Poplar

One of the most popular trees, because of its rapid growth and shapely appearance. Nothing better can be obtained for avenues and lanes or to refresh the monotony of shade trees.

Carolina Poplar

A very hardy variety of poplar, that is quick growing and furnishes good shade very soon after planting.

Tulip Tree

Suitable for driveways and parks. Has a rich, glossy foliage. Has a large tulip-like flower of greenish color.

Umbrella Catalpa

Excellent for ornament, but grows only to a height of from three to ten feet. Has a large leaf, dense foilage that lays in layers, forming the umbrella shape.

Wisconsin Weeping Willow

A very hardy variety, well adapted to our climate. The leaves are whitened on the lower surface.

Evergreen Trees

In the following list we confine ourselves to perfectly hardy species, and the varieties such as are useful for general planting:

American Arbor Vitae, Pyramidal Arbor Vitae, Rosedale Arbor Vitae, Golden Arbor Vitae, Irish Juniper, Norway Spruce.

Hedge Plants

California Privet—The most popular of all ornamental hedges having a foilage of great beauty which it carries far into the winter. Very hardy, and easily grown.

Amoor River Privet—Said to be hardier than the California Privet and of darker color.

Roses

We recommend the following varieties of roses:

Climbing—Crimson, Yellow and White Rambler, Baltimore Bell, Queen of Prairie.

Everblooming Roses—Anne de Diesbach, bright rose color; Cleo, flesh color; Earle of Dufferin, velvet crimson; Frau Karl Druschki, white; General Jacqueminot, dark red; General Washington, bright, shining crimson; Madame Gabriel Luizet, pink; Margaret Dickson, white; Madame Plantier, white; Marshall P. Wilder, bright cherry carmine; Paul Neyron, pink; Prince Camille de Rohan, crimson; Ulrich Brunner, cherry.

Tea Roses—Catherine Mermet, pink; Etoile de Lyon, yellow; Papa Gontier, red; Perle des Jardins, yellow; Sunrise, yellow; Sunset, orange; The Bride, pure white.

A List of the Best Shrubs

WITH COLOR OF FLOWERS

- Althea*—Double Flowering, red, white, purple and blue.
Barberry—Thunbergii, dwarf, red berries.
Deutzia—Double White-Flowering, white; Pride of Rochester, white tinged with rose.
Elder—(Sambucus) Variegated, foliage white; Aurea, light yellow, golden foliage.
Eleagnus—Longipes, flowers creamy, fruit red.
Exochorda—Grandiflora, white.
Forsythia—Viridissima, Fortuneii and Suspensa, yellow.
Hydrangea—Paniculata Grandiflora, white.
Honeysuckle—White, yellow and pink; Tartarian, red, pink and white.
Lilac—Common purple and white.
Purple Fringe—or Smoke Tree, reddish-purple.
Prunus—Pissardi, reddish-purple leaves.
Spirea—Van Houttei, white.
Snowball—white.
Syringa—(Philadelphus) white.
Waxberry—or Snowberry, white and red fruited.
Weigela—Rosea, rose.
White Fringe—White.

Climbing Vines

The Kudzu Vine—Grows with remarkable rapidity—from 40 to 60 feet in a single season after the root is well established—and its foliage, consisting chiefly of very large leaves, is luxuriant and healthy. It is now being extensively planted in the north and south to cover arbors and verandas. In the North the plant dies to the ground in the winter.

Clematis—Jackmanni, purple, well known, and popular; Henryi, white, the best white; Madame Edouard Andre, red; Paniculata, fine white flowers, late.

Honeysuckle—Monthly Fragrant, red and yellow; Chinese Twinning, white; Halleana or Hall's Japan Evergreen; Scarlet Trumpet; Yellow Trumpet.

Ivy—English.

Wistaria—Chinese Purple; Chinese White.

What Our Customers Say

The following are a few unsolicited testimonials received from customers who bought trees in the fall of 1912.

R. H. TICE,

Williamson, N. J.

The trees received in good condition and are fine stock. Please send me a catalogue and price list.

MRS. C. W. HOERMANN,

Elmont, Mo.

The fruit trees received here in good condition. Many thanks.

A. M. LAUGHMILLER,

Chester, Ark.

I wish to say that I am very much pleased with my order. I have them all set out but twenty, and wish to say that this is the best lot of trees I have received in any order.

T. J. BELL, Prop.,

Middle Creek Farm,

Dustin, Oklahoma.

I received fruit trees, have them out and am well pleased with same.

MRS. GEO. BYNUM,

Skiatook, Oklahoma.

Trees reached us in fine shape and we are more than pleased with them. Many thanks for the complimentary rose, also the apple tree you sent each of us. Thanking you very much for your promptness and the nice Nursery stock you sent.

H. J. BROWN,

Board Camp, Ark.,

I wish to state that I am well pleased with the \$28.00 bill of trees I received from you in this month consisting of Apples, Plums, Peaches, Cherries, Apricots and Prunes. I shall hereafter order of your Nursery.

N. A. TINNEY,

Gans, Okla.

I received my fruit trees in good condition and am pleased with my entire lot. I believe they are as fine as I have ever seen. (This man's order amounted to \$313.00).

O. J. WEST,

Alma, Ark.

The trees I ordered of you came in good condition. I received them the same day they were sent out. They were all first class trees.
